SIP TRUNK

We Are
Your SIP Trunk Provider

SIP trunking provides instant messaging, multimedia conferencing, 911 access, and tells callers if you're available or on the phone - all while saving you money. Utilize an IP-based system to support multiple numbers under 1 or 23 channels.

Customized for your Business Needs

Incredible Connection

24/7 Local Tech Support

Top-of-the-line Hardware

What is SIP Trunk

Unless otherwise specified by the Systems Engineer, Mosaic uses SIP trunking to provide connectivity for premise-based phone systems.

SIP trunks are phone lines delivered over the internet; within each trunk (phone line) there are multiple channels (phone numbers or connections). Using SIP, Mosaic connects one or more channels to the PBX on the customer premises to support required concurrent calls.
